

DATA INTREPRETATION OF THE STUDENT FEEDBACK ON
ONLINE LEARNING (2019-2020)

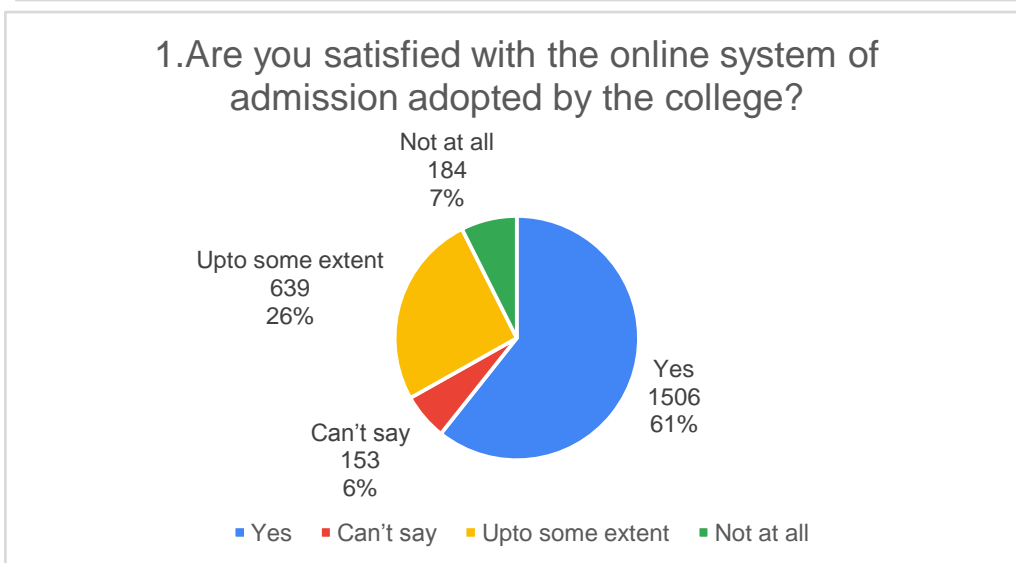

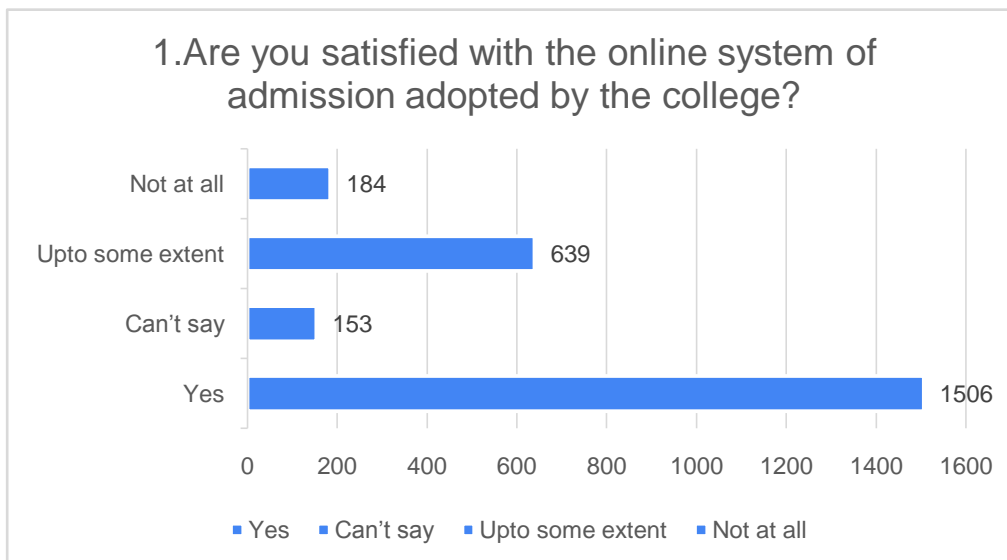

This is the period coincides with the extra ordinary situation arises due to COVID-19 and the online admission process was adopted by the college in this unprecedented times. About more than 62 percent of the newly admitted students were satisfied with the online admission process and about 72 percent students were able to get all necessary information regarding the various admission formalities online. The rest of the students may not be well equipped with the technological requirements or may have faced some problems in the connectivity and other related difficulties. The same problems have been solved by the concerned staff on the calls received by the college. The successful effort of the college faculty is shown, when we see that 97 percent students/applicants have given a high rating and are satisfied from the apps/tools & the online process adopted by the college teachers for the teaching of classes and 88 percent students are satisfied from the online content is being provided/shared by the teachers in their respective classes.

As per the student's feedback, it is evident that more than 80 percent students are satisfied from the punctuality and discipline during the online classes and the faculty is trying their level best to provide the best learning environment in the online classes. Our online classes are successfully running and able to provide as much as learning in the traditional offline physical classes. More than 50 percent students are even satisfied from the possible online co-curricular activities organized by college e.g. Expert Lectures, Quiz, Declamation and other alike competitions/events. The internal tests are being taken/conducted by the college successfully through the online medium and the teachers are able to solve almost all the queries/problems of the students. The Mock Tests conducted by the college to sensitize the students about the online examination process is a big help and success for the students. The online platform Zoom outperform all other online apps/mediums for the online learning followed by the effective use of Google Meet. Whereas the Google Classroom and Whatsup are the most sought and effective mediums to share the information, content and resources apart from the limited use of Email for the same. Overall, if we see the online sharing of knowledge help the students to learn on the virtual platforms more successfully with the help of teachers and the conducive learning environment has been created.
